

ChemSkid

- Compact unit, completely standardized
- Costs optimization integration
- Maximum safety
- Easy to maintain
- Operating conditions reliability

Applications :

This skid inject chemical (FeCl_3 , NaOH ...) in industrial process (water treatment, papeterie...).

Operation :

- Injection of product with external information (ex : pH control)
- Permutation on the stand-by pump

Equipments :

- Diaphragm dosing pump
- 1 or 2 duty pumps with one stand by
- Integration control accessories and security system
- Drip tray

Options :

- Pressure switch
- Flowmeter
- Manometer
- Vacuum pump (starting)
- Junction box
- Control panel

Approximate dimensions :

1800 x 400 x 1200 mm (L x W x H)
