

Discarding your worn rotors? Think again... Think PCM!

HOW WILL YOU BENEFIT FROM ROTOR REFURBISHMENT?

A worn rotor

- You will experience savings of up to **60%** on the cost of a new rotor
- You will receive a guarantee for the dimensions and surface finish of your rotors
- You will find the level of finish and performance quality to be exactly identical to that of a new rotor

OUR EXTENSIVE SERVICE INCLUDES:

- Checking the dimensions (verification of technical feasibility) against the pattern plate and providing a clear cost estimate for repairs
- Removal of chrome plating on rotor
- Refilling of material, if required
- Check on dimensions
- Providing new chrome plating
- Professional polishing
- Supplying and mounting of rings on stainless steel rotor
- A final check on dimensions (original PCM dimensions)
- Reshipping (upon request)

Same rotor after PCM rechroming
