

Pump protection through detection

PCM SAFETY AND MONITORING ACCESSORIES OFFER YOU:

- A wide range of sensors
- Lower operating costs for your installation
- Reduced risk to your personnel and equipment

- 1 - Stator Security System: Detects 'product presence'. Shuts down the pump in the absence of product. Highly recommended to protect the Moineau pump stators
- 2 - Pressure sensor: measures and transmits a pressure
- 3 - Pressure transmitter: measures, transmits, and shuts down the installation in the event of overpressure
- 4 - Pressure transmitter with LED display: visual monitoring, measures, transmits, and shuts down the pump in the event of overpressure
- 5 - Pressure gauge: Visual monitoring of pressure

OUR EXTENSIVE SERVICE INCLUDES:

- An analysis of your requirements (parameter to be measured, environment, connector type, etc.)
- Advice on what accessories your installation needs
- Supply of accessories with instruction manuals and connection diagrams
- Installation and commissioning assistance By PCM
Hotline: +33 (0)8 92 46 03 33
- PCM commitment concerning equipment selection
